

# Curriculum Vitae

Joachim Luginbühl  
Höschgasse 36, 8008 Zürich, Switzerland  
Phone: +41 78 892 46 49  
E-mail: [Joachim.Luginbuehl@gmail.com](mailto:Joachim.Luginbuehl@gmail.com)

## Personal data

---

Date of birth: 02.12.1981  
Place of birth: St.Gallen, Switzerland  
Nationality: Swiss  
Marital status: Unmarried

## Education

---

**10/2014 – present**      **Post-doctoral JSPS fellowship in the unit of Jay W. Shin, RIKEN  
Yokohama, Japan**

**10/2008 – 06/2014**      PhD in the group of Prof. Dr. Ernst Reichmann  
Tissue biology research unit, Department of surgery – University Children's  
Hospital, Zurich.  
FP6 EuroStec PhD program <http://www.eurostec.eu/>

**03/2006 – 05/2008**      Master of Science in Animal Biology in the group of Prof. Dr. Silvia Arber  
Biocenter, Basel  
Titel of the Master thesis: Unraveling genetic control-mechanisms of motor  
circuitry in mouse

**06/2002 – 01/2006**      Study of Biology at the Biocenter in Basel

**07/2001**                      High school graduation, Romanshorn, Switzerland

## Work experience

---

**07/2003 – 09/2003**      Volunteer at Tortugas, Mexico

**07/2002 – 09/2002**      Internship at Nestlé Schweiz AG, Quality-control lab Basel.  
Revision of a new concept documenting laboratory equipment  
(standard operating procedure), chemical examinations etc.

**08/2001 – 12/2001**      Internship at Nestlé Schweiz AG, Quality-control lab Basel.  
Compile approx. 170 instructions that describe the examination  
of all primary products used in the manufactory: pH, common  
salt, photospectrometric examination, peroxid-number, free fatty  
acids, sensory examination etc.

## Professional Skills

---

Cell culture: human, rat, pig and mouse primary cell types; assembly and analysis of human skin substitutes in vitro and in vivo; assembly and analysis of a human dermal microvasculature consisting of blood and lymphatic microvessels; animal surgery (mouse and rat); FACS; immunofluorescence; in situ hybridization; confocal microscopy; molecular cloning, PCR, RT-PCR; Northern and Western blots; histology

## Further education and workshops

---

- Education and training of persons carrying out animal experiments, Basel, Switzerland, 10/2006
- LTK Module 20E: Introductory Course in Laboratory Animal Science, Zürich, Switzerland, 05/2009
- Weiterbildung: Das Zürcher Schweinmodell, Bern, Switzerland, 08/2011
- Novartis Topik basic information security training, Basel, Switzerland, 11/2006

## Publications

---

Luginbuhl, J., Marino, D., Hartmann-Fritsch, F., Scola, S., Meuli, M., Reichmann, E.. Pre-existing capillaries and early inoculation significantly improve the physiological healing of transplanted bioengineered dermo-epidermal skin substitutes. *In preparation (2013)*.

Marino, D. and Luginbuhl, J., Meuli, M., Reichmann, E. Prevascularizing dermo-epidermal skin grafts with blood and lymphatic capillaries: Generating the missing lymphatic link. *Submitted (2013)*

Scola, S., Luginbühl, J., Busetto, A., Biedermann, T., Marino, D., Pontiggia, L., Reichmann, E. Redefining Stem Cells in Human Skin Epidermis: Suprabasal Keratinocytes are Transit Amplifying Cells. *In preparation (2013)*

Hartmann-Fritsch, F., Biedermann, T., Braziulis, E., Luginbuhl, J., Pontiggia, L., Bottcher-Haberzeth, S., van Kuppevelt, T.H., Faraj, K.A., Schiestl, C., Meuli, M., et al. Collagen hydrogels strengthened by biodegradable meshes are a basis for dermo-epidermal skin grafts intended to reconstitute human skin in a one-step surgical intervention. *J Tissue Eng Regen Med*. [Epub ahead of print]

Hartmann-Fritsch, F., Hosper, N., Luginbuhl, J., Biedermann, T., Reichmann, E., and Meuli, M. Human amniotic fluid derived cells can competently substitute dermal fibroblasts in a tissue-engineered dermo-epidermal skin analog. *Pediatr Surg Int* 29:61-69.

Kottmann, J., Rey, J.M., Luginbuhl, J., Reichmann, E., and Sigrist, M.W. Glucose sensing in human epidermis using mid-infrared photoacoustic detection. *Biomed Opt Express* 3:667-680.

Braziulis, E., Diezi, M., Biedermann, T., Pontiggia, L., Schmucki, M., Hartmann-Fritsch, F., Luginbuhl, J., Schiestl, C., Meuli, M., and Reichmann, E. Modified plastic compression of collagen hydrogels provides an ideal matrix for clinically applicable skin substitutes. *Tissue Eng Part C Methods* 18:464-474.

Montano, I., Schiestl, C., Schneider, J., Pontiggia, L., Luginbuhl, J., Biedermann, T., Bottcher-Haberzeth, S., Braziulis, E., Meuli, M., and Reichmann, E. Formation of human capillaries in vitro: the engineering of prevascularized matrices. *Tissue Eng Part A* 16:269-282.

## Conferences with oral presentations

---

<b>ESAO</b>	European society for artificial organs, Porto, Portugal, September 2011
<b>TERMIS</b>	Tissue engineering and regenerative medicine international society, Granada, Spain, June 2011
<b>TERMIS</b>	Tissue engineering and regenerative medicine international society, Galway, Ireland, June 2010
<b>JPSS</b>	The 22nd International Symposium on Paediatric Surgical Research, Genoa, Italy, September 2009
<b>TERMIS</b>	Tissue engineering and regenerative medicine international society, Seoul, South Korea, September 2009

## Languages

---

German	Mother language
English	Excellent
French	Good

## Interests

---

Playing and writing music, sports (sailing, dancing, jogging), reading, travelling.
